PROFILE

Responsible and motivated student ready to apply education in the workplace. Offers excellent technical abilities with software and applications, ability to handle challenging work, and excellent time management skills. Motivated student seeking internship in Software Engineering to gain hands-on experience. Outgoing and friendly with strong drive to succeed.

EDUCATION

2022 - 2025

MUMBAIUNIVERSITY

- Degree (Bsc) in Information Technology
- GPA: 9.9 / 10.0

2021

JAI HIND COLLEGE, MUMBAI

- XII - Maharashtra Board 82.33%

2019

SETH JUGGULAL PODDAR ACADEMY, MUMBAI

- X - ICSE 85%

LANGUAGES

- English (Fluent)
- Hindi

PROJECTS

- CodeTech : https://codetech-new.vercel.app
- Thread-clone: https://thread-gamma.vercel.app/
- Ai-saas : https://ai-saas-ruby-theta.vercel.app/
- White Board : https://miro-app-psi.vercel.app/
- E-commerce App: https://github.com/Hitesh-s0lanki/amazon-flutter

SKILLS

Machine Learning And Deep Learning

- Strong understanding of machine learning concepts and algorithms, including supervised learning, unsupervised learning, and reinforcement learning.
- Proficient in feature engineering, model evaluation, and hyperparameter tuning techniques to optimize model performance.
- Experienced in implementing machine learning algorithms using TensorFlow, scikit-learn, and other libraries to solve real-world problems in domains such as natural language processing, computer vision, and recommendation systems.
- Expertise in deep learning architectures such as convolutional neural networks (CNNs), recurrent neural networks (RNNs), and deep autoencoders.Skilled in advanced deep learning techniques like transfer learning, generative adversarial networks (GANs), and sequence-to-sequence models.Experienced in applying deep learning to tasks like image classification, object detection, text generation, and time series forecasting

Web Scraping

- Proficient in web scraping techniques using libraries such as BeautifulSoup, Scrapy, or Selenium.
- Skilled in extracting data from various sources on the web, including static HTML pages, dynamic JavaScript-rendered content, and APIs.
- Experienced in parsing and processing scraped data into structured formats like CSV, JSON, or databases for further analysis or integration into machine learning pipelines.

Full Stack (Web and App) Development

- Comprehensive understanding of both frontend and backend development technologies.
- Proficient in utilizing Redis as a caching layer to improve the performance and scalability of web applications
- Expertise in designing and developing RESTful and GraphQL APIs to facilitate seamless communication between frontend and backend systems.
- Proficient in building efficient and scalable web applications using Next.js, a popular React framework.Experienced in server-side rendering (SSR), static site generation (SSG), and client-side rendering (CSR) with Next.js.Skilled in optimizing Next.js applications for performance and SEO.
- Strong proficiency in data modeling, querying, and database administration

Languages and tools

- C, C++, Java, Python, Javascript, Web Assembly, Typescript, bash , R
